Reasons for Allowance

The following is an Examiner's Statement of Reasons for Allowance: The claimed invention is allowable over the combined teachings of Kan et al., and Mullis et al., the closest prior art, for while Kan et al., does teach the detection of a polymorphism in a non-coding region that is adjacent to a structural gene, it does not teach the amplification of the non-coding and coding regions. Kan et al., also does not teach a correlation between polymorphisms in a non-coding region and an allele of interest such that the identification of the polymorphism would allow for the determination of the coding region alleles. Further, while Mullis et al., clearly does teach amplification of a target nucleic acid sequence, they do not teach nor reasonably suggest that primers be used to amplify a non-coding region that is in linkage to an allelic sequence.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
